

CHINA & NORTH KOREA

The explosion of the Gospel in China is no secret. Today, it has the fastest growing Christian population in the world—an estimated 80 million believers—with thousands coming to know Christ on a daily basis.

You may be unaware that North Korea is also experiencing a silent revival. The strengthening winds of revolution are fanning the steady flame of the Gospel into a wildfire. Thousands are imprisoned every year for refusing to deny their faith in Christ. Not even the iron rule of a decades-long dictatorship can quell this spiritual uprising.

This is a pivotal time for East Asia's spiritual growth. Together, we can make an impact today that will help define its tomorrow. Even as Christianity remains restricted by the government—including inhumane forms of persecution—the Gospel grows at an unstoppable rate.

The rapid growth of this movement has produced an overwhelming need for spiritual nurturing but a comparatively slow increase in resources. This tragedy has resulted in many new believers who lack depth in their personal relationships with Christ. World Help has not only seen the need for the Word of God, but for developmental tools for new believers as well.

More than ever, China and North Korea need Bibles, churches, and competent Christian leaders.

CONFIDENTIAL MATERIAL

World Help has supported spiritual development in China and North Korea for 20 years, but now, more than ever, our actions are paving the way for transformation.

With the help of visionary supporters, we actively support church planters and key leaders of the house-church movement who provide training to young leaders in effective and Biblical methodology. And the results of these investments have been incredible.

Since the beginning of our work there, we have seen thousands of churches planted, millions of Bibles distributed, the training of visionary leaders, and an inestimable number of people transformed by the redemptive power of God.

Along with traditional Bible distribution, we've also gone digital! In China, we're sharing USBs formatted with copies of the Bible in both Mandarin and English. These USB drives are being circulated among university students and have the potential to impact 5 million Chinese youth. Advances like these are helping to pave the way toward spiritual success for the future generations emerging from China's loosening religious control.

Undeniably, our involvement in China and North Korea is echoing into eternity. But the need is still so vast . . . the call so urgent . . . and we are committed to doing everything in our power to see that the Gospel is shared with every individual.

Our goal is to raise \$175,000 to support our network of church planters who will launch 7,500 churches to introduce 750,000 people to Christ through God's Word.

The vision is big—but God is bigger. We must work urgently. Now is the time to act on these nations' forward momentum. By investing heavily in their evangelical movements, we can strengthen their progress toward continued spiritual development.

Will you join us in making an eternal impact on generations to come?
