

# OPERATION BABY RESCUE

## THREE WAYS to get involved . . .

### RESCUE

Support the full cost of a baby rescue, or combine your gifts with the contributions of others.

### FUNDRAISE

Create your own online fundraising page to rally others for the cause.

### ADVOCATE

Spread the word about this need with your friends, family, and community.

## OPERATION BABY RESCUE

An initiative of World Help that provides life-saving treatment for thousands of children battling the effects of malnutrition in impoverished communities.

### OUR STRATEGY

Our strategy is to rescue and nourish sick and dying children back to health by providing much-needed medical attention, nutrition, and other supplies that can save their lives. **For just \$1,200, you can rescue a baby in need.**

While each child's story and needs are different, most rescues require similar resources to save lives. The cost of each rescue includes the following options for care, depending on each child's unique circumstance:

- **RESCUING THE CHILD:** Some children are left abandoned in the slums while others live in remote and virtually inaccessible regions. Rescuers sometimes travel up to six hours to reach children in need.
- **MEDICAL TREATMENT AND/OR HOSPITAL STAY:** Certain severe cases require extensive or prolonged attention.
- **HOUSING AND CARE FOR FAMILY MEMBERS:** Many families accompany their children to the treatment location.
- **FOOD AND CLOTHING:** These supplies are sent back with the family once the children are nursed back to health.

### FOLLOW UP

Though the severity of each child's condition varies, the majority regain their health and are restored back to their families. Many also receive assistance through our Child Sponsorship Program.

- The parents of each child are trained on proper sanitation, nutrition, and care of the child and are given provisions to necessitate a successful transition back home.
- Follow-up visits are made to ensure that the child remains healthy and cared for properly.
- By building this relationship with the families, we hope that the love of Christ is shown practically and relationally.
- In some severe cases where the effects of disease or malnutrition are irreversible, special-needs care is available.

### THE SUCCESS

Since inception, hundreds of children have been rescued through *Operation Baby Rescue* . . . lives saved and hope restored.
