

## YOU PROVIDED CLEAN WATER TO PEOPLE IN NEED

Thank you for your compassion and commitment to change the lives of people in need through the gift of clean water.

By providing clean water, you've helped protect families from waterborne diseases. You've eliminated the need for women and children to spend hours each day collecting water. You've helped gardens and farms flourish. And you've improved almost every facet of a person's life.

Here are two testimonies to give you a glimpse at the impact of your life-changing gift:

### ATMABAI: CLEAN WATER FOR A MOM AND HER KIDS

Atmabai is a mother of three living in India. Collecting clean water had always been a challenge for Atmabai. She'd have to travel a mile each day to gather water from a dirty pond. Since she couldn't leave her children alone at home, so she would have to bring them with her.

It was a tedious process. Atmabai would have to keep her children on the path, out of harm's way, all while carrying heavy jugs full of dirty water back to their home.

But now, **because of clean water donors like you, Atmabai and her family have easy access to clean water.** Atmabai doesn't have to go far to gather water.

*Your gift of clean water is giving entire communities hope for a better future!*

She doesn't have to worry about taking her children along a long and dangerous road. And she knows the water she brings home won't make her family sick.

"The well with clean water accessible to all is a great blessing to our family, especially the kids," Atmabai said. **"We no longer have to struggle, walking long distances for this necessity. The well will change the lives of everyone around us for the better."**

Thanks to your generosity, families like Atmabai's now have clean water just steps away. Thank you for changing their lives forever.

## DOREEN: YOU HELPED FARMERS IRRIGATE THEIR CROPS

Doreen and her husband work hard to provide for their four children. Unfortunately, the little money that he makes as a farm laborer and she earns selling goods in the market often isn't enough. Most of their income goes toward their kids' schooling, so there is little left over to buy nutritious food for the family.

**Doreen has always dreamed of having her own garden so she could grow healthy vegetables of her own for her children.** However, droughts are common in Zambia where Doreen lives. Without easy access to a reliable water source, Doreen had no way to keep a garden alive and put food on the table.

But recently that all changed ... because **Doreen finally has a well in her village!** She can't wait to fulfill her dream of providing for her family by growing her own food.

"Now we can do gardening and see development in this place," Doreen said. "Please continue the good work you are doing. God bless you"

**Your gifts provided hope to help people like Atmabai and Doreen.**

# THANK YOU!
