HUMANITARIAN AID CONTAINER SHIPMENTS

When crisis, disaster, or poverty strike, World Help is uniquely equipped and positioned to meet the temporary and ongoing needs of hurting people around the world. By working with national partners who are already on the ground, we are able to respond quickly and effectively to bring lifesaving aid and relief to those who are suffering.

OUR APPROACH

Food insecurity: Food insecurity impacts hundreds of millions of people every year, causing malnutrition, stunted growth, and even death. You can provide warm, nutritious meals for individuals in need.

Disaster response: When a disaster strikes, a quick and effective response can save lives and keep the tragedy from escalating.

Health care: Patients suffer when hospitals and clinics lack vital equipment; but, an entire community can prosper when facilities are properly equipped.

Refugee assistance: Emergency aid is a daily need for the more than 79 million displaced people in the world, since most have no way to provide for themselves.

Education: Basic supplies such as paper, pencils, and calculators enable schools in developing countries to offer students the best possible education.

Community wellness: For communities without basic hygiene products, necessities including soap, diapers, and toothpaste can be transformational and restore a community to health.

You can ship lifesaving supplies to countries like Guatemala, Honduras, Zambia, Uganda, Burundi, Nepal, and Jordan.

AID BY THE NUMBERS

Our goal in 2021 is to procure, ship, and distribute 60 containers filled with 10 million meals and other aid and relief to 16 countries, impacting over 600,000 people.

Sending containers to different regions of the world costs, on average:

\$21,500

ON AVERAGE

1 CONTAINER =

Around **10,000** people helped

Your gift of any amount will go directly to provide emergency aid and relief to those in critical need.

Even if you can't ship an entire container, every \$1 you donate will still ship \$21 worth of lifesaving supplies!
