PROJECT REPORT

YOU GAVE CLEAN WATER TO **PEOPLE IN NEED**

Thank you for providing clean water to men, women, and children around the world!

Giving a community in need access to clean water is a life-changing gift. Thanks to your generosity, children will no longer suffer from waterborne diseases. Instead, they can go to school and focus on their education. Women won't have to make dangerous journeys every day to fetch water for their families, and agriculture and livestock will have the chance to flourish, producing more food and income for people living in poverty.

Here are two testimonies to give you a glimpse at the incredible impact your gift made:

MOHAN: MAKING DREAMS COME TRUE

Mohan and his family live in a rural village in India, and they didn't have access to clean water for years. The people in Mohan's community would gather groundwater from open fields, but it dried up during the summer months. Their only other water source was far away, and they frequently became sick when they had to drink it.

Mohan's village begged local authorities for a water facility but never received one. As time passed, they began to lose hope that they'd ever have access to clean water.

Thankfully, because of generous donations like yours, a clean-water project was completed in Mohan's village! Now, the entire community has clean water right outside their doors. Mohan shared with our partner that

Thank you for providing clean water to people around the world — your gift was life-changing!

having clean water feels like a dream come true.

"Having a water facility at [my] doorstep is like my dream come true," Mohan said. "All villagers are very happy. Now, we don't have to use water from unclean sources."

Your gift completely changed the lives of people like Mohan — in more ways than one. When you helped provide access to clean water, you also gave them a chance to experience the love of Jesus.

FABIO: BUILDING A HEALTHY COMMUNITY

For almost three decades, Fabio's village in Honduras had no access to water.

Can you imagine? They had no safe and easy way to get a drink, wash their hands, or cook meals. Women and children woke up each morning and walked over two hours away to draw water ... but this created a new problem.

Since wildlife also used this water, it was contaminated with dangerous diseases. **Unfortunately, there were only two options for Fabio and his loved ones. It was either die of dehydration or take their chances drinking the dirty water.**

They knew the water caused them to get sick, but what other choice did they have?

That's when donors like you stepped in to complete a clean-water project in Fabio's village! The clean water you helped provide completely transformed the community.

"Thanks to you, after more than 25 years, we now have clean water for our church, homes, and school," Fabio said. "God bless you for making this project possible."

THANK YOU!
