

WorldHelp® PRAYER GUIDE

Join the World Help family in praying for medical needs around the world.

WEEK 1

PRAY FOR PEOPLE LIVING FAR FROM MEDICAL FACILITIES

People living in rural areas often lack access to medical care. Many impoverished, remote communities lack operational medical centers and can be so isolated that it takes hours or even days to reach the nearest facility. People living in these communities can't get the medical treatment they need. *Please pray that God would provide rural communities with access to medical care.*

WEEK 2

PRAY FOR PEOPLE WHO CAN'T AFFORD MEDICAL CARE

For families and individuals who can barely afford food and other daily necessities, medical care is often unaffordable. As a result, easily treatable illnesses can quickly become life-threatening, and people with injuries can't get the lifesaving care they need. *Please pray that affordable medical care becomes available for struggling men, women, and children.*

WEEK 3

PRAY FOR CLINICS AND HOSPITALS WITHOUT ACCESS TO SUPPLIES

Medical facilities operating in impoverished or rural areas often lack sufficient medical supplies, such as respirators, hospital beds, monitors, and medications. Without these items, the staff struggles to provide proper treatment to their patients. *Pray for God's provision over these medical clinics and hospitals as they serve people in need.*

WEEK 4

PRAY FOR SPONSORED CHILDREN WHO DREAM OF WORKING IN THE MEDICAL FIELD

Many sponsored boys and girls dream of becoming doctors, nurses, and surgeons so they can serve their communities and improve access to medical care. These children often live in poverty and can't reach their goals without support. But thanks to child sponsorship, they have the tools and resources to pursue a brighter future. *Pray that these children will be able to successfully pursue their dreams of a medical career.*

Ship medical supplies and other essentials to people in need!
